DANIEL TUSINGWIRE

Product Design Engineer

+256 758 361 967 | dtusingwiree@gmail.com | Uganda

PROFESSIONAL SUMMARY

Product Design Engineer with over 5 years of experience contributing to the design and development of digital products, with experience across mobile applications, business software, and customer-facing platforms. Skilled in translating complex business requirements and user needs into intuitive product experiences through user research, interaction design, information architecture, wireframing, high-fidelity UI design, and interactive prototyping.

Combining hands-on product design experience with a Bachelor of Science in Software Engineering, I bring a practical understanding of both user experience and technical implementation. Experienced in working across the product development lifecycle, from problem discovery and concept development to design validation, developer handoff, implementation, and continuous improvement. Proficient in Figma, design systems, cross-functional collaboration, and AI-assisted product development, with a focus on building accessible, consistent, and effective digital experiences.

CORE COMPETENCIES

Product Design & User Experience	Research & Product Validation	Prototyping & Design Systems	Software Engineering & AI
• End-to-End Product Design • Mobile Application Design • UX Design • UI Design • Interaction Design • Information Architecture • User Journey Mapping • User Flows and Wireframing • High-Fidelity Interface Design	• User Research and Customer Interviews • Usability Testing • Product Discovery • Requirements Analysis • Customer Feedback Analysis • Design Iteration and Validation	• Low- and High-Fidelity Prototyping • Interactive Prototyping • Design Systems and Component Libraries • Reusable UI Components • Design Documentation • Developer Handoff • Design Quality Assurance	• HTML, CSS and JavaScript • Software Development Lifecycle • Software Architecture Fundamentals • Database and API Concepts • Agile Product Development • AI-Assisted Product Development • Prompt Engineering

PROFESSIONAL EXPERIENCE

01/2024 – Present
Bujjuko, Wakiso, Uganda

Product Design Engineer

farmsell (Tech-Enabled Agricultural Enterprise)

Contributed to the design and development of a multi-product agricultural commerce ecosystem, building digital applications that connect farmers, business partners, aggregators, distributors, and buyers. Worked across product discovery, user experience design, prototyping, design systems, and implementation, translating operational and business requirements into practical digital workflows.

- Designed and refined user experiences across multiple mobile applications, including the Buyer, Business Partner, Distributor, and Aggregator applications, supporting different user groups within the agricultural commerce ecosystem.
- Translated business requirements and customer needs into user flows, information architecture, wireframes, interactive prototypes, and high-fidelity mobile interfaces.
- Designed application workflows for product discovery, farmer registration, partner management, product listing, inventory coordination, and agricultural commerce operations.
- Worked on complex, role-based experiences, ensuring that application features, navigation, permissions, and workflows aligned with the responsibilities of different platform participants.
- Collaborated with business stakeholders, operations teams, and customers to understand existing processes, identify usability challenges, and translate findings into product improvements.
- Participated in field activities and customer engagement to understand user behaviours, operational challenges, and the practical conditions in which the applications were used.
- Created and maintained reusable design components, interaction patterns, and design system documentation to improve consistency across applications.
- Worked closely with software engineers throughout product development, communicating design specifications, reviewing implementation, and resolving usability and interface inconsistencies.
- Conducted design reviews, gathered feedback, and refined product experiences through iterative design and validation.

- Applied AI-assisted tools and prompt engineering to support product discovery, workflow exploration, documentation, and product development activities.
- Contributed to continuous product improvement by evaluating existing workflows, identifying usability gaps, and recommending design solutions.

11/2022 – 11/2023
Kampala, Uganda

Product Design Engineer

Othware Limited Uganda

Contributed to product design and development activities at Othware Limited, working across product requirements, user experience design, interface development, and product implementation. Collaborated with the team to translate business and user needs into functional product experiences.

- Participated in product discovery and requirements analysis to understand business problems, user needs, and product objectives.
- Translated product requirements into user flows, wireframes, interface designs, and interactive prototypes.
- Designed and refined user-centred interfaces and workflows for software products.
- Developed and refined product interactions, navigation structures, and reusable interface components.
- Collaborated with software engineers and stakeholders to align design decisions with technical requirements and implementation constraints.
- Participated in design reviews, implementation feedback, and product quality assurance to ensure consistency between approved designs and delivered functionality.
- Contributed to improving existing product experiences through feedback, usability considerations, and iterative design improvements.

09/2020 – 09/2022
Wakiso, Uganda

Junior Product Designer

Tallen Limited – Software Development Company

Progressed from a Product Design Intern into a Junior Product Designer role, contributing to the design and development of software products across education, e-commerce, and enterprise applications. Worked with clients, product stakeholders, and development teams to transform user and business requirements into functional, user-centred digital experiences.

- Contributed to the design of software products, including education management systems, e-commerce applications, and internal business management platforms.
- Worked with clients and product stakeholders to understand business processes, user requirements, and functional expectations.
- Conducted user research, customer interviews, and usability evaluations to identify user challenges and inform design decisions.
- Created user flows, information architecture, wireframes, and interactive prototypes to communicate product concepts and validate proposed solutions.
- Designed high-fidelity user interfaces with attention to visual hierarchy, typography, navigation, accessibility, and consistency.
- Collaborated with developers during product implementation to clarify design requirements, review interfaces, and address usability issues.
- Contributed to reusable UI components and design system documentation to maintain consistency across different software products.
- Participated in product discovery and design reviews, incorporating stakeholder and user feedback into subsequent design iterations.
- Supported frontend implementation activities, strengthening collaboration between product design and software development.

06/2020 – 09/2020
Wakiso, Uganda

Product Design Intern

Tallen Limited – Software Development Company

Joined Tallen as a Product Design Intern, gaining practical experience in designing software products and translating user requirements into structured interface solutions. Worked alongside designers and developers on real-world digital product development projects.

- Assisted in designing user interfaces for education management systems, e-commerce applications, and business software.
- Created low-fidelity wireframes, user flows, and high-fidelity interface mockups using Figma and Adobe XD.
- Participated in requirements discussions and design activities to understand user needs and product objectives.
- Supported user research and usability evaluation activities, helping identify opportunities to improve navigation and product interactions.

- Assisted in maintaining reusable UI components and visual design consistency across product interfaces.
- Collaborated with developers to communicate design specifications and understand the implementation of interface elements.
- Developed practical skills in interaction design, visual hierarchy, prototyping, and collaborative product development.

EDUCATION

05/2021 – 08/2025
Nsambya, Kampala

Bachelor of Science in Software Engineering
Cavendish University Uganda

12/2019 – 02/2020
Kampala

Certificate in Graphic Design
Fine Graphic School

2018 – 2019
Nansana, Kampala

A-Level Certificate (UACE)
St Joseph's Secondary School

2014 – 2017
Nansana, Kampala

O-Level Certificate (UCE)
St Joseph's Secondary School

PROFESSIONAL TRAINING & CERTIFICATIONS

User Experience Design
Georgia Institute of Technology · 2022

UX Design Fundamentals
California Institute of the Arts · 2022

Data Analytics Fundamentals
IBM

Introduction to HTML, CSS and JavaScript
Coursera

DESIGN & DEVELOPMENT TOOLS

- Figma and FigJam
- Adobe XD
- Adobe Photoshop
- Adobe Illustrator
- Adobe InDesign
- Git and GitHub
- Microsoft Teams
- Google Workspace
